(3 Ways of Working, 2 Power Skills, 2 Business)

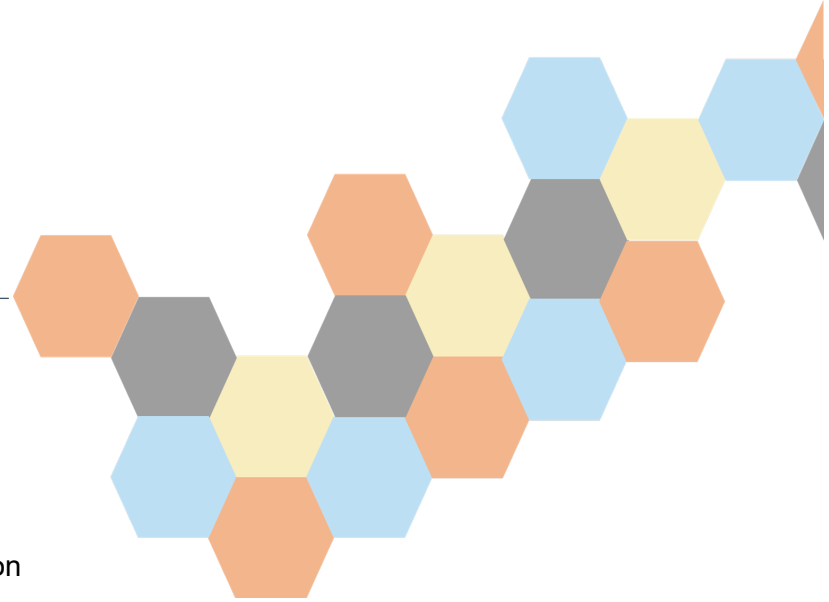

**Program Knowledge Level:** Basic

**Field of Study:** Business Management & Organization

**Prerequisites:** None

**Advance Preparation:** None

**Benefits:** Create an agile mindset by exploring tools and techniques

### Course Overview

“Agile” has become a hot buzzword in many management circles. Some think it is a new concept. But, without digging very deep, it is easy to see that good project management has always required agility from the project managers and their teams. In this workshop, we will explore a few of the concepts associated with adaptive project management and consider how we can leverage them in many projects.

The goal is to identify specific tools, concepts, and approaches that we can put to work immediately in a variety of our projects; and by trying and adapting them, find what works best for us. Create a mindset to continue to explore and analyze tools and techniques that we can apply and adapt.

There are many versions of adaptive project management approaches. This workshop focuses on some of the most popular ones and identifies some tools to explore each:

- Kanban Board
- Daily Stand-ups
- Retrospectives
- Problem Definition
- 5 Whys
- Value Chain
- Value Stream Mapping and Analysis

### How Instructor-Led Training Works

This Instructor-Led Training (ILT) course is facilitated by one of our talented instructors at your location, creating a cooperative and collaborative, learner-centric “classroom.” Our top-rated instructors hold a variety of certifications and have delivered training to organizations in more than 40 countries.

### **On-site**

Participants attend this one-day in-person course, complete activities live during the training session, and participate in discussions focused on the pragmatic application of key concepts. Session materials are provided in PDF format for download and/or printing.

### **Virtual**

This course is delivered virtually using the AdobeConnect platform. Two 3.5-hour sessions are scheduled. Participants attend the virtual sessions, complete activities live during the session, and participate in discussions focused on the pragmatic application of key concepts. Session materials can be downloaded in PM College's learning management system (LMS).
